SUMMARY

Software engineer and solutions architect specializing in production systems, integrations, APIs, and internal platforms. Experienced in architecting and building end-to-end software that connects ERP, e-commerce, payment, marketing, and operational systems, with a focus on automating complex business workflows and delivering reliable production systems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, SQL, PowerShell, Python, Swift
Backend & APIs: Node.js, Express.js, REST APIs, API Integration, OAuth 2.0
Frontend: Vue.js, Vuetify, SwiftUI
Databases: SQL Server, MongoDB, SQLite
Cloud & Infrastructure: Microsoft Azure, Azure Blob Storage, Azure AI Search, Nginx, PM2, Heroku, Linux
AI & Automation: RAG, LLM Integration, Document Indexing & Chunking, Azure AI Services
Integrations: BigCommerce, SYSPRO E.Net, Salesforce, Authorize.Net, PayPal, Klaviyo
Tools: Git, GitHub, Mezmo, Docker

EXPERIENCE

Solutions Architect / Software Engineer, Yeti Cycles, Denver, 1/2021 – Present

- Architected and built a centralized e-commerce integration and orchestration platform connecting ERP, e-commerce, payment, marketing, fraud prevention, and 3PL systems across US and European operations; platform processes $10M+ in annual transaction value.
- Developed and maintained integrations with SYSPRO e.net, BigCommerce, Klaviyo, PayPal, Authorize.Net, Boxture/3PL, NoFraud, and internal e-commerce systems, supporting order processing, exchanges, refunds, inventory, pricing, shipping, and customer data synchronization across US and European operations.
- Designed the platform with centralized logging, monitoring, and error alerting through Mezmo, providing operational visibility and troubleshooting across production integrations and systems.
- Built automated inventory and product pricing feeds from SYSPRO to BigCommerce and Klaviyo using SQL, Node.js, and TypeScript, keeping e-commerce product availability and pricing synchronized with ERP data.
- Architected and built an internal e-commerce operations and ERP management platform, providing employees with tools for purchase order creation and maintenance, job creation and maintenance, sales order maintenance, inventory management, warehouse lookup, and other ERP workflows.
- Implemented Microsoft Entra ID single sign-on and role-based authorization across internal applications, providing centralized authentication and controlled access to business functionality.
- Architected and implemented a Retrieval-Augmented Generation (RAG) AI knowledgebase agent end-to-end, integrating Azure Blob Storage, Azure AI Search, document indexing and chunking, retrieval, LLM services, and Zendesk to assist with customer support inquiries.
- Developed an iOS application in Swift for product configuration, alongside the web-based product configuration application powering Yeti's customer-facing product setup experience.

Full Stack Developer / IT Manager, Yeti Cycles, Denver, 1/2019 – 1/2021

- Established Vue.js and Vuetify as the standard frontend architecture for internally developed applications.
- Architected and developed product development/testing and warehouse inventory platforms using Vue.js, Node.js, MongoDB, and ERP/e-commerce integrations.
- Developed customer-facing product configuration and multi-country sales tax application integrating Google Maps Places and TaxJar APIs.
- Built event management software integrated with Salesforce to support market research, customer data collection, and marketing initiatives.

Full Stack Developer / Technology Coordinator, Yeti Cycles, Denver, 6/2017 – 1/2019

- Developed and supported internal full-stack applications, including an enterprise technology asset management platform.
- Researched and implemented technology solutions while supporting IT operations, infrastructure planning, and business process improvements.

Technical Engineer | Windows Operations, **CBS**, Hollywood 7/2016 – 10/2016

- Supported Windows server migrations, upgrades, patching, infrastructure security, and data center operations in a large enterprise environment.

Windows Systems Administrator, **American Public Media Group**, LA/Minneapolis, 1/2013 – 9/2016

- Managed Active Directory, VMware, Office 365, Exchange Online, SCCM, Windows servers, and enterprise infrastructure across geographically distributed offices.
- Automated administrative and systems management tasks using PowerShell and PowerCLI; supported critical broadcast and media systems in a 24x7x365 environment.

SIS Systems Administrator I / IT Systems Specialist, **Infinite Campus, Inc.**, Blaine, MN, 12/2010 – 12/2012

- Supported enterprise application deployments, SQL Server databases, remote-access systems, backups/restores, and production application infrastructure.
- Designed and deployed corporate-wide SCCM infrastructure and software distribution while supporting Windows, networking, Active Directory, and end-user systems for 400+ employees.

EDUCATION

Web Development Immersive, General Assembly, Los Angeles, CA, 3/2017

Associate of Applied Science, Computer Networking, Dunwoody College of Technology, Minneapolis, MN, 12/2010
